

Introducing the first revolutionary biodegradable vinyl banner material.

It's Hot!

EcoBan is a high quality 15 oz. matte, strong indoor / outdoor, front-lit scrim biodegradable banner vinyl. EcoBAN performs very similar to our standard vinyl with one major difference. In landfill conditions it attracts microbes that break down the PVC within 3-5 years. EcoBAN contains no toxic materials and is tear, fade and fungus resistant. This banner vinyl will not leave it's imprint on the planet through chlorine or other toxic emissions.

- 80% Non-petroleum.

- EcoBAN does not release toxins into the environment.

- EcoBAN is oil and chemical resistant.

- EcoBAN resists sunlight and rain.

- EcoBAN is landfill degradable.

- EcoBAN has the same characteristics as standard vinyl.
