

We now offer a technologically advanced way of combining performance with ecological responsibility.

# Recycled & Biodegradable!

Splat!dpi is proud to present two different environmentally friendly extruded foam (PVC) products. EcoPVC Recycled is made with 70% recycled product and has the same performance benefits as our standard PVC. EcoPVC Biodegradable is formulated in the USA with bio-active ingredients that allow it to break down in landfills without the presence of light, heat or moisture. Both products fully recyclable when used with our UV ink system.

- EcoPVC Biodegradable becomes fully biodegraded in 1-5 years.
- EcoPVC Biodegradable is OSHA approved as Non-Hazardous for handling.
- EcoPVC Biodegradable is ASTM D 5210-92(2000) Certified to biodegrade in anaerobic environments.
- EcoPVC Biodegradable made with 99% virgin PVC 1% Microbial metabolism.
- EcoPVC Recycled made with 70% recycled material 30% Virgin PVC.
